Customer EPCRA Supplier Notification for Reporting Year 2021

Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) requires certain facilities that manufacture, process, or otherwise use listed toxic chemicals to report the annual quantity of such chemicals entering each environmental medium. EPCRA Section 313 is also known as the Toxic Release Inventory (TRI).

Elgiloy Specialty Metals manufactures standard and custom specialty metals and alloys. Elgiloy – Elgin is an industry leader in producing the highest quality light gauge strip. We offer precision rolling of nickel, cobalt, titanium, and stainless-steel alloys.

This letter is to inform you that the products that you purchase from us contain one or more listed chemicals subject to Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) or 40 CFR Part 372. If you need information about the specific 313 chemicals in the products you purchase from us, please contact your sales representative.

If you are unsure about whether you are subject to the reporting requirements or need more information, call the EPA/TRI Information Center. For contact information, see the TRI Home Page <http://www.epa.gov/tri>.

Please note that if you repackage or otherwise distribute products you purchase from us on to other industrial customers, a notice similar to this one should be sent to those customers.

Sincerely yours,

Alexandra Moore-Staub
